

# DWA\_07.4 Knowledge Check\_DWA7

---

1. Which were the three best abstractions, and why?

I think the best abstractions was encapsulating the major logic of getting the data into functions, putting them into their own js file, and then importing them and calling the functions

getData, getAuthors, getGenres

---

2. Which were the three worst abstractions, and why?

The search function and the amount of document query selectors

---

3. How can The three worst abstractions be improved via SOLID principles.

By keeping everything single use, that can help with managing complexity,

---
